California’s vaccination plan

California is allocating COVID-19 vaccines as they become available to ensure equitable distribution. Initially vaccination was limited to healthcare workers and long-term care residents.

The next to be vaccinated will be individuals who:

- Have higher risk for severe disease or death (due to age or other factors)
- Are unable to work at home.
- Live or work in geographic areas that have been highly impacted.
- Are most likely to spread disease to other workers or to the public

These individuals will be prioritized as follows:

**Phase 1A**

About 3 million people

- Healthcare workers
- Long-term care residents

See CDPH Allocation Guidelines for Phase 1a

**Phase 1B**

**1B Tier One:**

- Individuals 65 and older
- Those at risk of exposure at work in the following sectors:
  - Education and childcare
  - Emergency services
  - Food and agriculture

**1B Tier Two:**

- Those at risk of exposure at work in the following sectors:
  - Transportation and logistics
  - Industrial, commercial, residential, and sheltering facilities and services
  - Critical manufacturing

- Congregate settings with outbreak risk:
  - Incarcerated
  - Homeless

**Phase 1C**

- Individuals 50-64 years of age
- People 16-49 years of age who have an underlying health condition or disability which increases their risk of severe COVID-19
- Those at risk of exposure at work in the following sectors:
  - Water and wastewater
  - Defense
  - Energy
  - Chemical and hazardous materials
  - Communications and IT
  - Financial services
  - Government operations / community-based essential functions
1. **COVID-19 Vaccination Rollout**

There are currently no FIRST doses, age-based community vaccinations clinics available. Public announcements will be made once additional clinics are scheduled.

The people in the highest risk categories, as set by the state and federal government, are eligible for vaccine. These are people at risk of getting COVID-19 because they work in specific jobs in health care or because they live or work in certain types of nursing homes.

Butte County is in **Phase 1B, Tiers 1** of the state of California’s prioritization tiers, offering vaccine to approved healthcare facilities for vaccination of specific healthcare personnel working in the following settings: Categories with a CHECK MARK indicate groups that the vaccine is currently available to. Unchecked boxes indicate groups that do not have access to the vaccine yet.

2. **Current Vaccination Locations**

Currently no information at this time.

3. **Getting Vaccinated**

Register to be notified about the vaccine (click specific form below):
